Celebration of world breastfeeding week

Heaver Nicola

In supporting World Breastfeeding Week 2008, Tshwane District Hospital from the 01 - 07 August has arranged special awareness campaigns at various service points i.e. OPD, Ward 02 and etc to disseminate comprehensive information to the publics to promote breastfeeding.

With this year's theme "mother support: going for the gold", the emphasis is on the following circle of support:

Family and social networking support:

- during pregnancy reduces stress
- during labour empowers the mother
- increases mother's confidence in her ability to breastfeed

Workplace and Employment should:

- offer an environment that facilitates mother-baby contact or expression & storage of breastmilk

Government / Legislation that:

- combats aggressive marketing of breast-milk substitutes
- Health care assists mothers by:
 - giving friendly pre-natal care
 - supporting labour and delivery services
 - postpartum to facilitate bonding & optimal infant feeding
